The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Allman et al in view of Watkins et al.

Allman et al show a portable sink unit which includes an electrical pump P, electrical plug 70, fresh water tank 36 with external supply 38; holding tank 60 respective water lines, an electric heater (see col. 3, line 19), drain and locking wheels 26, 26'. Lacking is a plastic construction as taught by Watkins et al at col. 2 lines 52-55 and an optional fresh water supply exclusive of the holding tank. Watkins et al also teach the latter at col. 5, line 55 through col. 6 line 59 including appropriate check valves for directional flow. As the two references show identical art devices it would have been obvious to provide the former with the plastic construction of the latter as well as the optional supply system.

Re: claim 2, the use of a GFI would have been obvious to the ordinary artisan as same is well known in the art and probably mandated by local code.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3751

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4-6 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Watkins et al.

See the explanation of Watkins et al in the rejection of claim 1 supra.

Maddux shows another portable sink.
